24. The Entity has complied with all externally imposed capital requirements.

#### **Representations Regarding Taxation Balances**

25. Deferred tax assets and liabilities are measured based on the tax rates (and tax laws) enacted or substantively enacted at the end of the reporting period.

26. Recognised deferred tax assets represent those amounts that are probable of realisation, taking into account management's estimates of future taxable profit. In determining estimates of future taxable profit against which the deductible temporary differences, unused tax losses or unused tax credits can be utilised, management has considered:

- a) the existence of taxable temporary differences relating to the same taxation authority, the same source of taxable profit, and the same taxable entity that will reverse in the same period that deductible temporary differences will reverse;

28. We have not received any advice or opinion that contradicts the Entity's support for accounting for income taxes, or that contradicts the financial statement amounts and presentations in respect of tax, or that is necessary to understand the Entity's tax accrual and related matters and has not been disclosed to you.
